

ARIZONA SOCIETY OF CIVIL ENGINEERS
PHOENIX BRANCH YOUNGER MEMBER FORUM FOUNDATION

From 1989 to the present the Arizona Society of Civil Engineers (AzSCE) Phoenix Branch Younger Member Forum (PBYMF) has raised over \$60,000 for scholarships and funds toward engineering education and awareness in Arizona. Although this is a source of great pride it is just the beginning!

In 2001, the PBYMF became the first, and only, Younger Member Forum to have an ASCE approved Foundation. With an initial investment of \$10,000 the PBYMF Board created the Phoenix Branch Younger Member Forum Foundation to "Promote the civil engineering profession through the distribution of funds towards engineering education and public awareness in the state of Arizona." This fund is destined to become a major sponsor of the civil engineering community in the state of Arizona for years to come.

You can become a PBYMF Foundation Donor by committing an individual contribution or a firm/group contribution. All donations to the PBYMF Foundation are 100% tax deductible. The PBYMF will send you a reminder if you would like to spread your donation over time.

PBYMF Foundation Donors will appear annually in the AzSCE Newsletter which goes to all ASCE members in Arizona. A list of Donors will also be displayed whenever money is donated from the fund and in public relations literature. Please review the list of organizations that the PBYMF has assisted in the past and help us increase the support that we can give to our community.

There is no doubt the PBYMF Foundation will be well known and respected beyond the civil engineering community. As proud members of the civil engineering community, please join in becoming a Donor of the

PBYMF Foundation and share in this opportunity to become a part of this worthwhile effort.

Thank you for your generosity. Please complete the form below and mail it with your check. If you have any questions concerning the PBYMF Foundation please contact:
